

# DO SCIENTISTS BELIEVE IN GOD

20 years ago— Francis Collins' survey indicated that only 45% of scientists were theists (i.e. believers in God—a higher power)

Current—Pew Survey

American Association for the Advancement of Science

	Theists	Atheists
All Scientists	51%	20%
Young Scientists	66%	13%
Physicians	76%	11.6%

This trend towards belief in God has been attributed to recent Cosmologic evidence and the study of Near Death Experiences
