

## **Juan's Out-Of-Body Experience (OBE) during brother's death**

*Glimpses of Eternity, Raymond Moody, MD*

**Juan's older brother walked into the room, stumbled and collapsed on the floor. Juan's brother suddenly went from being extremely distressed to extraordinarily calm. A smile of peace and serenity came over his face, which frightened Juan.**

**Suddenly, Juan felt himself lift out of his body and look down on the scene below. From this perspective he could see his brother leave his body in a sort of "clear light" that rose from his chest and moved rapidly away.**

**With his brother gone, Juan faced another dilemma: he couldn't get back into his body. At first he panicked. Then he relaxed and enjoyed it. "This is what death is" he told himself, reveling in this unique visual perspective.**

**Finally, when emergency services arrived, Juan returned to his body and began to laugh. "The emergency-service people were surprised to find me laughing over my brother's dead body. I didn't tell them what had happened because they would have taken me to the hospital instead of my brother."**
